

Brightmail Anti-Spam makes email more productive and useful by providing enterprises with advanced anti-spam defenses and technologies. Deployed at the Internet gateway, Brightmail's award-winning solution boasts the industry's highest accuracy rate, ensuring that users don't miss important email.

## CATCH THE MOST SPAM

Brightmail's complete spam defense leverages a cocktail of effective technologies, a huge spam detection network, and a real-time rule delivery mechanism.

- Six separate technologies target different types of spam
- Proactive heuristic and machine learning technologies trap evolving spam
- Patented spam signatures stop real-time spam attacks
- Dynamic list of open proxy servers identifies and blocks spammers
- Intelligent filters block foreign language spam

**Spam-Catching Rate: 95%**

## ACCURATELY

False positives (messages incorrectly identified as spam) cause users to lose faith in spam blocking. From day one, Brightmail has had an unwavering commitment to protecting legitimate mail. Many Brightmail customers feel comfortable deleting spam without review.

- Automated and manual safeguards
- Support for false positive submissions
- Review (by a Brightmail technician) of every false positive
- Corrected rules deployed globally within minutes

**Accuracy Rate: 99.9999%**

## WITH ZERO ADMINISTRATION

Many anti-spam solutions place even more burden on administrators. Immediately effective out-of-the box and constantly updated, Brightmail Anti-Spam doesn't require any tuning or training of filters by administrators.

- Automatic, timely, secure updates
- 24/7/365 protection from new spam attacks
- New filters available every 10 min
- Global operations centers with facilities in the US, Ireland and Australia
- Real-time visibility of new spam trends

**Ongoing Administration: None**

## AWARDS

"If you want to make sure that important messages get through to your employees, BAS is the best answer we know of."

November 11, 2003  
 Brightmail Anti-Spam 5.1  
 Brightmail, Inc.

## LEADERSHIP

**SEATS PROTECTED: 300 million**  
**WORLDWIDE EMAIL FILTERED: 15%**  
**EMAIL FILTERED: 91 billion/month**  
**YEARS IN BUSINESS: 6+**  
**ENTERPRISE CUSTOMERS: 2000+**  
**TOP 10 U.S. ISPS: 7**

## TESTIMONIALS

"Brightmail Anti-Spam blocks the 20% of our email that was spam — saving the average employee over an hour per month. Nobody wants to go back to the chaos we had before."

**DENNIS J. BELL**  
 Director Of Technical Operations  
 Cypress Semiconductor

## POWERFUL SPAM MANAGEMENT

### Flexible Spam Handling

- Modify subject line or header
- Delete
- Forward to email address for review
- Quarantine

### Per-User Quarantines

- Web-based quarantine
- Exchange quarantine for Outlook users
- Domino quarantine for Lotus Notes users

### Tailor Filtering at your Site

- Categorize messages as spam or suspected spam based on spam scores
- Define different actions for spam and suspected spam
- Set tolerance level for suspected spam

## PER-USER SPAM CONTROL

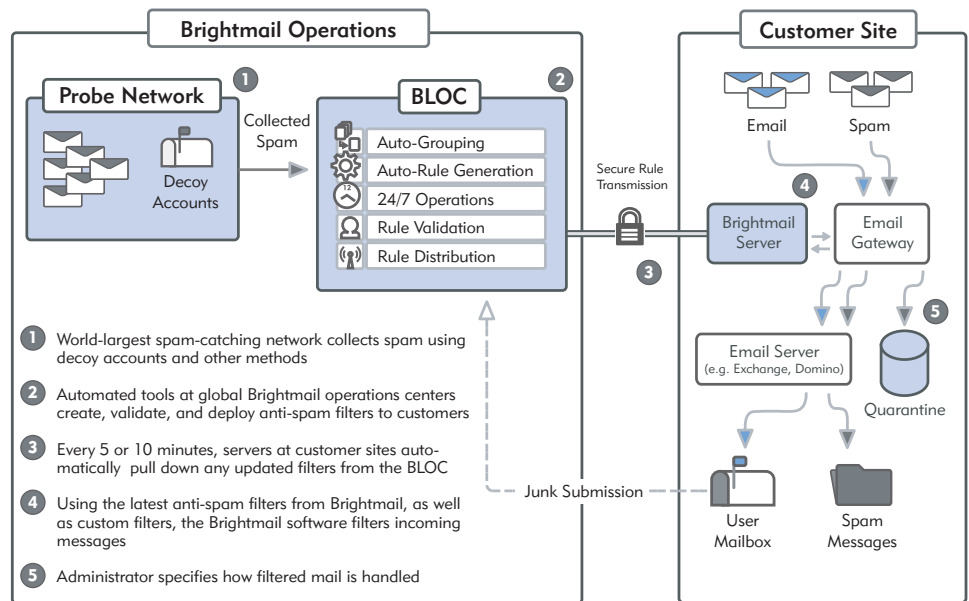

Brightmail plug-ins available for popular email clients provide powerful spam management tools for your users

- **Personal whitelists**—Users specify trusted senders who will never be filtered: automatically populate from sent items and contact lists (Outlook only)
- **Personal blacklists**—Users set up lists of blocked senders (Outlook only)
- **Submissions**—Users can submit missed spam or false positives back to Brightmail (Outlook and Notes)

## REPORTING

- **Multiple categories**—Reports based on spam, suspected spam, blacklists, whitelists and viruses
- **More granularity**—Reports based on recipient, sender, recipient domain, sender domain, and IP addresses

## HOW IT WORKS

## FLEXIBLE CUSTOM RULES

Customize filtering and enforce email policies with custom filters using a graphical interface

- **Blacklists**—Block by sender, IP address or via DNS-based real-time lists
- **Whitelists**—Allow by sender, IP address or via DNS-based real-time lists
- **Custom Rules Editor**—Write custom mail filters using any of 16 types of filters including subject or body keywords

## ANTI-VIRUS PROTECTION

Add-on anti-virus module scans message attachments for viruses and worms

- **Worm auto-delete**—Removes emails associated with worms
- **Easy administration**—Seamlessly integrated with Brightmail Anti-Spam

## SYSTEM REQUIREMENTS

### Windows

- Windows 2000 Server or Windows Server 2003
- Intel Pentium 4 processor or compatible
- 512 MB RAM minimum
- 250 MB disk space minimum

### Solaris

- Sun Solaris 2.8 or 2.9
- UltraSparc processor
- 512 MB RAM minimum
- 250 MB disk space minimum

### Linux

- Red Hat Linux 7.2, 7.3, 8.0, Red Hat Enterprise Linux AS 2.1, or Red Hat Enterprise Linux ES 2.1, ES 3.0
- Intel Pentium 4 processor or compatible
- 512 MB RAM minimum
- 250 MB disk space minimum
